

## Canon Volume V — Governance Diagnostic Toolkit

The architecture of order made operational.

Governance is not the bureaucracy of power. Governance is the stewardship of order — personal, institutional, national.

This toolkit equips leaders to audit, correct, and fortify governance systems across every level.

### 1. Authority Health Index (AHI)

Measure the strength, legitimacy, and moral clarity of authority.

### 2. Governance Order Scale (GOS-5)

Assess how structured, disciplined, and aligned a system is.

### 3. Stewardship Competency Map (SCM)

A high-level governance skill map for leaders.

### 4. Institutional Drift Detector (IDD)

Find where systems are drifting before collapse becomes visible.

### 5. Long-Horizon Leadership Audit (LHLA)

A strategic audit of the leader's time, vision and legacy orientation.
