

Intervention Path Selector

Determines what should happen next when action can no longer be deferred.

PROBLEM STATEMENT (ONE SENTENCE)

ESCALATION LEVEL

1	2	3	4	5
Operational		Strategic		Existential

URGENCY

1	2	3	4	5
Months		Weeks		Immediate

EVIDENCE SUFFICIENCY

1	2	3	4	5
Insufficient		Adequate		Decisive

AUTHORITY CONSTRAINT

1	2	3	4	5
None		Partial		Severe

PRIMARY TENSION SIGNALS (UP TO 3)

PREVIOUS INTERVENTION ATTEMPTS

RESOURCES AVAILABLE FOR INTERVENTION

PAGE 2 — COMPARE INTERVENTION PATHS

Path Comparison Matrix

Score each path 1–5 on three dimensions. Net = Feasibility + Time Fit – Failure Risk. Highest net = recommended.

STABILISE

Fix within current authority and resources. No structural change.

Feasibility: ____/5

Time Fit: ____/5

Failure Risk: ____/5

NET: ____

RESTRUCTURE

Requires new authority, team composition, or process redesign.

Feasibility: ____/5

Time Fit: ____/5

Failure Risk: ____/5

NET: ____

ESCALATE

Exceeds current leadership mandate. Higher authority must act.

Feasibility: ____/5

Time Fit: ____/5

Failure Risk: ____/5

NET: ____

MONITOR

Evidence insufficient or timing premature. Accumulate and observe.

Feasibility: ____/5

Time Fit: ____/5

Failure Risk: ____/5

NET: ____

PAGE 3 — RESOLVE CONFLICT + SELECT PATH

Path Conflict Resolution

TIE-BREAKER RULES (WHEN TWO PATHS SCORE WITHIN 1 POINT)

STABILISE vs RESTRUCTURE !' Default to RESTRUCTURE. Stabilisation in ambiguous conditions de

STABILISE vs ESCALATE !' Default to ESCALATE. If escalation is plausible, the mandate gap is alre

RESTRUCTURE vs ESCALATE !' Default to ESCALATE. Restructuring without higher authority usually

Any path vs MONITOR !' Default to the active path. Monitoring is only correct when evidence is gen

SELECTED PATH

- ☐ STABILISE
- ☐ RESTRUCTURE
- ☐ ESCALATE
- ☐ MONITOR

RATIONALE FOR SELECTION (ONE SENTENCE)

FALLBACK TRIGGER LOGIC

If the selected path fails, what specific signal triggers the fallback? Define the condition, not just the alternative.

FALLBACK PATH

TRIGGER CONDITION (WHAT MUST HAPPEN TO ACTIVATE FALLBACK)

TRIGGER TIMELINE (BY WHEN MUST THE SIGNAL APPEAR)

STRATEGY ROOM READINESS INDICATOR

- ☐ Evidence is sufficient to justify intervention
- ☐ Authority constraints are identified and documented
- ☐ Consequence has been priced (or can be priced in Executive Reporting)
- ☐ Escalation is not premature — local resolution has been attempted or ruled out

If all 4 boxes are checked: this condition is ready for Strategy Room (£395).

PAGE 4 — EXECUTE: ORDERED INTERVENTION STACK

Intervention Stack

Define 3–5 ordered actions for the selected path. Each action needs: dependency, urgency, effect, resistance, and failure signal.

ACTION 1		%i	Immediate	%i	Short-term	%i	Structural
ACTION:							
DEPENDS ON:							
LIKELY RESISTANCE:							
EXPECTED EFFECT:				FAILURE SIGNAL:			
REASSESS IF:							

ACTION 2		%i	Immediate	%i	Short-term	%i	Structural
ACTION:							
DEPENDS ON:							
LIKELY RESISTANCE:							
EXPECTED EFFECT:				FAILURE SIGNAL:			
REASSESS IF:							

ACTION 3		%i	Immediate	%i	Short-term	%i	Structural
ACTION:							
DEPENDS ON:							
LIKELY RESISTANCE:							
EXPECTED EFFECT:				FAILURE SIGNAL:			
REASSESS IF:							

ACTION 4		%i	Immediate	%i	Short-term	%i	Structural
ACTION:							
DEPENDS ON:							
LIKELY RESISTANCE:							
EXPECTED EFFECT:				FAILURE SIGNAL:			
REASSESS IF:							

PAGE 5 — OUTPUT

Intervention Path Output

SELECTED PATH (STABILISE / RESTRUCTURE / ESCALATE / MONITOR)

ORDERED ACTIONS (SUMMARY, 1–5)

RISK NOTE

ESCALATION DECISION

STRATEGY ROOM READY? (YES / NO + REASON)

“Wrong intervention does not slow recovery. It compounds failure.”

Feeds into Executive Reporting: Governed Recommendations, Priority Stack, Decision Logic, Strategy Room Bridge.

SYSTEM TRANSITION

If this condition is confirmed, move to Executive Reporting (£95) to price consequence and formalise next action.

If intervention is already justified, move to Strategy Room (£395).

First use: Read condition (p1), compare paths (p2), resolve + select (p3), build stack (p4), record output (p5).
