Global Market Intelligence Board Deck Q1 2026

Board-Ready Summary of Structural Market Intelligence

Board-ready summary deck distilling structural market intelligence from Q1 2026 into decision-grade format for governance bodies and executive leadership.

Abraham of London • 2026-04-21

Purpose

This deck exists to give governance bodies the minimum viable intelligence needed to make structural decisions about institutional positioning in Q1 2026.

It is not a market report. It is a decision instrument.

Macro Signal Summary

[object Object],[object Object],[object Object],[object Object][object Object],[object Object],[object Object],[object Object],[object Object],[object Object],[object Object],[object Object],[object Object],[object Object],[object Object],[object Object],[object Object],[object Object],[object Object],[object Object],[object Object],[object Object]

Strategic Recommendations

For Boards

1. Audit decision authority chains — verify who actually decides vs who formally decides
2. Stress-test execution pathways — identify where governance intent and operational reality diverge
3. Assess resilience capacity — determine whether current structure can absorb a 6-month disruption

For Executive Leadership

1. Close the execution-governance gap before it becomes visible externally
 2. Re-establish authority clarity at the decision layer
 3. Accept that efficiency optimisation without resilience is now structural risk
-

Decision Required

This intelligence requires one of three responses:

1. **Acknowledge and monitor** — accept the structural environment and prepare contingency
 2. **Intervene preventively** — address governance gaps before they become crises
 3. **Restructure proactively** — realign authority, execution, and governance before external pressure forces it
-
