The Legacy Architecture Canvas

Beyond Bequest. The Framework for Intentional Endurance.

This is not a document about death. It is the operating system for a living legacy. Designed for founders, leaders, and stewards who view their life's work as capital--human, intellectual, social, and financial--to be engineered for multigenerational impact.

The Architecture Process

This structured framework transforms abstract values into executable design:

- The Sovereign Thesis** - Define the core, non-negotiable principle of your legacy. What is the *why* that must survive all else?
- The Capital Matrix** - Map your key capitals: **Human** (character), **Intellectual** (philosophy), **Social** (networks), **Financial** (assets), and **Structural** (institutions).
- Institutions & Stewardship** - Design the formal/informal institutions ([Family]/[lexicon/family] Council, Trust, Annual Retreat) that steward each capital.
- Risk Architecture** - Identify failure modes--from dilution to dependency--and engineer specific safeguards and governance guardrails.
- Rituals & Cadence** - Establish quarterly/annual review rhythms that institutionalize reflection, adaptation, and stewardship.
- Communication Protocol** - Design how and when to transmit this framework to the next generation of stewards.

What This Produces

- A Living [Legacy]/[lexicon/legacy] Constitution** - Not a static document, but a dynamic operating system for your values
- Intergenerational [Governance]/[lexicon/governance] Blueprint** - Clear roles, responsibilities, and decision-rights for stewards
- Risk Mitigation Framework** - Proactive design against the 7 classic failure modes of legacy
- Stewardship Rituals** - Quarterly and annual review cadences that institutionalize reflection and adaptation

Implementation Note: Begin with the Sovereign Thesis alone. Sit with it for one week. The clarity--or friction--it generates will illuminate the necessity of every subsequent component.
